

United We Stand

PATTERN DESIGNED BY JUDY GALE ROBERTS
PROJECT CUT BY MIKE AND VICKY LEWIS

To make this design, attach the pattern to the blanks and cut the frets. Use double-sided tape to attach the 1/4" (6mm)-thick Baltic birch plywood for the backing, and then cut the perimeter. Stain the fretwork as desired, and paint the backing board with blue and red or use glue sticks to attach appropriate colors of construction paper to the fretwork. Then, glue and clamp the backing board to the fretwork. Apply a clear spray finish to the front of the piece and attach a hanger to the back.
